

### Coombe Barn

Contract Value: £170,000

Architect: Strutt and Parker

On this site RB repaired and converted Coombe Barn to form a new conservation education centre. The roof structure was partially renewed and completely recovered. New timber walls with external weatherboard cladding enclosed the open sides, built off new cavity walls on new foundations.

New services connections and underground drainages were installed.

The project had to be environmentally sound therefore several bird boxes were installed in the gables and loft space, to provide habit for various birds inc Owls.
